HONCHO<sup>®</sup> PLUS, SUPER WHAM!<sup>®</sup>, FACET<sup>®</sup> 75 DF, OR CLEARPATH<sup>®</sup>**

## KEEP OUT OF REACH OF CHILDREN WARNING-AVISO

- This labeling must be in the possession of the user at the time of pesticide application.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on all EPA registered labels and Command<sup>®</sup> 3ME SLN No. AR08-0001 label are to be followed. Refer to all labels for use instructions, weeds controlled, and application instructions.

### DIRECTIONS FOR USE

Use PERMIT PLUS at .75 to 1.5 ounce by weight per acre, with the total application rate not to exceed 1.5 ounce of product by weight (0.062 lb. active ingredient) per acre per use season. Use 0.25 to 0.5 percent nonionic surfactant v/v which contains at least 80% active ingredient or 0.5 to 1% COC v/v with foliar applications of PERMIT PLUS.

With all foliar applications of PERMIT PLUS use a minimum 3-15 gallons of water per acre for aerial equipment and a minimum of 10 gallons of water per acre for ground equipment. Apply spray solutions the day they are mixed. Control of emerged weeds with foliar applications is best when 70% - 80% of the weed foliage is exposed. Control of submerged weeds is best when weeds have 2 leaves or less. Do not reintroduce water into rice fields for at least 24 hours following foliar applications of PERMIT PLUS.

### Aerial Application Requirements:

**Refer to Arkansas Pesticide Use and Application Act and Regulations ACT 389 of 1975 as amended.**

Aerial Applications - Apply approved tank mixture with properly calibrated equipment in 3 to 15 gallons of water per acre. Thoroughly clean equipment prior to mixing spray solution. Avoid streaking, skips, overlaps, and spray drift during applications.
